

Trace a PC Tag

If a veterinarian needs to trace a PC tag to determine the veterinarian who preconditioned the calf, call the IVMA office at 800-369-9564 or 515-965-9237.

The IVMA office will need the following information:

1. Tag number and color (green or gold)
2. The name of the veterinarian requesting the information
3. Why the trace is needed (ex: sick calf, calf not castrated/dehorned)

Information on Preconditioning Tags is given ONLY to IVMA member veterinarians and their staff.
